16 August 2021

**Covid-19 vaccination for young people aged 12 and over at Aargau secondary schools**

Dear Sir/Madam

In late June, we informed you that young people aged 12 and over would be able to receive a Covid-19 vaccination at the vaccination centres at the Aarau AG and Baden AG cantonal hospitals. This is still possible.

From the end of August 2021, young people can also receive a vaccination privately from various paediatricians' and GPs' offices. If you would like to take up this opportunity, please contact your child's paediatrician or GP and ask if they are performing vaccinations. From the end of August onwards, young people will be able to receive a vaccination at any vaccination centre. This is connected to the approval of the Moderna vaccine for this age group.

From September onwards, the Canton of Aargau will also be offering Covid-19 vaccinations at secondary schools in Aargau. Your school will inform you of the precise school vaccination date for your son/daughter directly.

Provided that you, as the parent/guardian, and your child consent to this, and there are no major health-related restrictions, Covid-19 vaccinations can be carried out at schools by mobile vaccination teams from Aargau's vaccination campaign.

In order to receive their vaccination at school, the students must bring the following documents with them:

- Signed declaration of consent (you will receive the form from school shortly).
- Health insurance card
- ID/passport/residence permit
- Vaccination record book if the Covid-19 vaccination is to be recorded in this.

For further information about the Covid-19 vaccination, please see the following links:
